## Summary

As a Full Stack Developer proficient in Angular, Node.js, and Ionic, I bring nearly 3 years of expertise in designing and implementing robust web applications. My skills encompass front-end and back-end development, with a focus on creating responsive and scalable solutions. I excel in leveraging Angular for dynamic user interfaces, Node.js for server-side logic, and Ionic for cross-platform mobile applications. I am eager to apply my technical proficiency and problem-solving abilities to drive innovation and efficiency in software development.

## Skills

- JavaScript | PHP | CSS | HTML | Angular | Ionic | Node | Bootstrap | Tailwind
- MySQL | PostgreSQL
- GitHub | GitLab | BitBucket

## Professional Experiences

### Senior Software Developer

### BolTech Solutions.

Lahore

08/2021 - Current

- As a Full Stack Developer proficient in Angular, Node.js, and Ionic, I bring nearly 3 years of expertise in designing and implementing robust web applications. My skills encompass front-end and back-end development, with a focus on creating responsive and scalable solutions. I excel in leveraging Angular for dynamic user interfaces, Node.js for server-side logic, and Ionic for cross-platform mobile applications. I am eager to apply my technical proficiency and problem-solving abilities to drive innovation and efficiency in software development.
- Led and mentored a team of junior developers, providing guidance and support to ensure best practices in coding, testing, and deployment. Actively participated in code reviews and contributed to continuous improvement of development processes.

## Projects

- **Sommsays...:** Contributed in the development of "Sommsays" digital wine-tasting game platform, designed to expand brand reach, engage customers, and capture value. This innovative platform allows users to have fun, learn about wines, provide feedback, and facilitate sales. By extending the personal wine sales experience into customers' everyday lives, the platform helps earn loyalty beyond price. Leveraged Angular, Node.js.
- **Gigmor:** Developed an application using Ionic that allows users to find music gigs, create their own gigs, discover talent, and stay updated with new releases and exclusive events. The app offers features such as gig discovery, talent search, event promotion, and show prompts, providing a comprehensive platform for music enthusiasts and artists. By leveraging Ionic, I created a user-friendly and interactive interface that enhances user engagement and supports the music community eliminating manual checks and facilitating faster response time.
- **Collaborative Diagram and Planning Tool:** Developed an application that enables users to draw diagrams, share screens using convergence, create plans, and design questionnaires, similar to the functionalities found in Miro. The platform supports real-time collaboration, allowing users to work together seamlessly on projects and brainstorming sessions. By implementing these features, the application enhances productivity and teamwork, providing a versatile tool for various planning and creative tasks.
- **Admin Portal for Food Delivery App:** Developed an admin portal for a food delivery app catering to office environments, enabling users to purchase food conveniently. Designed and implemented features for order management, menu updates, user management, and sales tracking.
- **Scuderia Car Parts:** Maintained and optimized ERP system operations for a spare carport company, ensuring seamless business processes and efficiency

## Education

### BS Engineering

UET, University of Engineering and Technology

Taxila, Punjab, PK

10/2015 - 02/2020

- Major in Mechanical Engineering

### FS c-Pre Engineering

PGC, Punjab Group of Colleges

Sialkot, Punjab, PK

06/2013 - 08/2015
